

Eco-Tip... Tips to help the Earth!

Save your dead batteries in a plastic container like this milk jug!

(AAA, AA, 9-volt, etc.)

Use rechargeable batteries whenever possible! Technology keeps getting better and improving in performance. Save money and get hundreds of charges from the same rechargeable. Either way--

Keep them out of the Landfill! Batteries contain heavy metals, plastic and hazardous materials that can be recovered, recycled and properly handled.

Bring them to our Ultimate Recycling Day (URD)
Sept. 19 at New Lex Kroger Parking Lot, 9-Noon!

URD events are held twice a year, once in the spring, once in the fall. Rechargeable batteries may also be returned to most electronics stores: Best Buy, Radio Shack, Staples, etc.
